Commentary (YoY Change)

- Global Bank reported a Net Income of \$37.3 million for the FY2022, this represents a y-o-y increase of 40.1%.
- Financial margin increased from 39.6% to 43.2%, mainly due lower libor costs coupled with our switch in the funding mix from corporate bonds to bilateral financings and change in our deposit mix.
- Loan loss expense declined to \$59 million for the year, a \$24.5 million decline when compared to the same period last year. The decrease is part of the positive evolution of the modified loan portfolio which helped ease our expected loss model provisions requirements.
