Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

1. General information

Global Bank Corporation (the "Bank") was incorporated in the Republic of Panama, and started its operations on June 1994 under a general banking license granted by the Superintendency of Banks of Panama, which enables it to carry out banking business in Panama and outside the Republic of Panama. Its main activity is related to commercial and consumer banking.

The main office of the Bank is located at Santa Maria Business District, Panama, Republic of Panama.

The Bank is a wholly-owned subsidiary of G.B. Group Corporation, an entity incorporated on April 20, 1993 according to the laws of the Republic of Panama.

The Bank has an Investment Management License granted by the Superintendency of Securities Market of Panama through Resolution SMV 46-17 of February 1, 2017.

Through Resolution SBP-0077-2019 of the Superintendency of Banks of Panama, the merger by absorption is authorized of the banking entities Global Bank Corporation, Banco Panameño de la Vivienda, S.A. and the company GB, AV INC., all belonging to the same economic group, of which, Global Bank Corporation is the surviving company.

The main activity of the Bank and its Subsidiaries is described in Note 32.

2. Basis of presentation

The interim condensed consolidated financial statements have been prepared in accordance with IAS 34 - Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). These interim condensed consolidated financial statements should be read in conjunction with the annual consolidated financial statements as of June 30, 2020, and for the year then ended, which have been prepared in accordance with International Financial Reporting Standards (IFRS)

3. Accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the audited consolidated financial statements as of June 30, 2020, and for the year then ended.

The Bank has not adopted early any other standard, interpretation or amendment that has been issued but is not yet effective as of March 31, 2021, and it is assessing the possible impact of these new standards on the interim condensed consolidated financial statements.

3.1 Comparative information

The information as of June 30, 2020 contained in these condensed consolidated interim financial statements is presented only for purposes of comparison with information related to the nine-month period ended March 31, 2021.

3.3 Reclassification of investments

On November 26, 2019, the Bank notified the Superintendency of Banks of Panama of its decision to reclassify the securities portfolio at amortized cost to the category of securities at fair value through other comprehensive income, as a result of a change in the Bank's business model. The carrying value of the reclassification was B/.213,816,270. As a result of the reclassification, an unrealized gain of B/.7,952,846 was recognized, which was recorded in other comprehensive income.

4.2.2 Movement of financial instruments and their provisions in the stages of IFRS 9

Due to the analysis of the Bank's exposure to credit risk by financial asset class, the internal classification and the "stage" without taking into account the effects of any collateral or other credit enhancements, are provided in the following tables. Unless specifically stated, for financial assets, the amounts in the table represent the gross carrying value. For loan commitments and financial collateral contracts, the amounts in the table represent the amounts committed or guaranteed, respectively.

Incorporation of forward-looking information

The Bank uses prospective forward-looking information that is available without undue cost or effort in its assessment of significant increases in credit risk, as well as in its measurement of expected loss provisions. The Bank's Risk Department uses external and internal information to generate a 'base case' scenario of the future forecast of relevant economic variables along with a representative range of other possible projected scenarios. The external information used includes economic data and forecasts published by government agencies and monetary authorities. These short and medium-term projections are the fundamental basis of the forward looking model.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

The Bank applies probabilities to the identified forecast scenarios. The base case scenario is the single most likely outcome. The Bank has identified and documented credit risk and expected loss analysis and, using statistical analysis of historical data, has estimated the relationships between macroeconomic variables and credit risk and credit losses.

For the year ended June 30, 2020, and given the effects on the economy resulting from COVID-19, the Bank has incorporated a Post Model adjustment to the estimate and in this adjustment, the main macroeconomic variable that enters the forward-looking model is the Gross Domestic Product (GDP) projection, which is the fundamental basis for the unemployment rate projection, and with this, the probable rate of credit defaults. The impact of this adjustment was an increase in the provision for expected losses in the amount of B/.24,553,433.

The following table lists the macroeconomic assumptions used, under base, optimistic and pessimistic scenarios and considers an average forecast period of two years. In addition, included is a sensitivity of the differential between the expected loss provision selected, based on the weighting of the different scenarios and the expected loss provision of each scenario..

| | (| Grow th | Sensitivity on the selected |
|-----------|--------|--------------|-----------------------------|
| Scenario | GDP | Unemployment | reserve |
| Optimist | 1.50% | 9% | (10,799,208) |
| Base | 0.0% | 11% | (1,542,603) |
| Pessimist | -1.50% | 13% | 9,170,906 |

The relationships predicted between key indicators and default rates and loss rates have been developed based on the analysis of historical data over the last 9 years.

The effects known to Management and that can be reasonably estimated have been recognized in the condensed consolidated financial statements as of March 31, 2021. The main assumptions described above may change as economic and market conditions change. (See Note 34).

Residential mortgage loans

The table below shows the loan portfolio ratio of the mortgage portfolio in relation to the value of its collateral ("Loan-To-Value" – LTV). The LTV is calculated as a percentage of the gross amount of the loan in relation to the value of the collateral. The gross amount of the loan excludes any impairment loss. The value of the collateral, for mortgages is based on the original value of the collateral at the date of disbursement.

To manage liquidity risk arising from financial liabilities, the Bank maintains effective liquid assets such as cash and cash equivalents and investments with an investment grade for which there is an active market. These assets can be sold easily to meet liquidity requirements. Consequently, the Bank believes that it is not necessary to disclose the maturity analysis related to these assets to enable the nature and extent of liquidity risk.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

4.4 Market risk

The following table summarizes the Bank's exposure to interest rate risk. The Bank's assets and liabilities are included in the table at carrying value, categorized by the earlier between the contractual repricing or maturity dates, whichever occurs first.

To assess the interest rate risks and impact on the fair value of the assets and liabilities, the Bank performs simulations to determine the sensitivity of assets and liabilities.

Management's monthly analysis is to determine the net impact on the financial instruments subject to market risk, taking into account the specific effects caused by increases and decreases of 100 basis points in interest rates. The results of these simulations are presented monthly in the asset liability committee (ALCO) to determine if the financial instruments of the Bank's portfolio are within acceptable risk parameters by management.

An analysis of the Bank's sensitivity is performed to determine the impact on assets and liabilities of the increases or decreases in market interest rates, assuming no asymmetrical movement in yield curves and a constant financial position is presented as follows:

4.5 Capital management

As of March 31, 2021, the Bank analyzes its regulatory capital applying the standards of the Superintendency of Banks of Panama based on the new agreements, Agreement No. 1-2015 of February 3, 2015 and Agreement No. 3-2016 of March 22, 2016, which modified Agreement No. 5-2008 of October 1, 2008 that established the standards to determine the weighted assets by credit risk and counterparty risk and the new agreements, Agreements No. 11-2018 of September 11, 2018, modified by Agreement No. 3-2019 of April 30, 2019, by means of which new provisions on Operating Risk are established. Also, Agreement No. 2-2018 of January 23, 2018, by means of which the Superintendency of Banks has determined to take into consideration other risks to determine the capital adequacy index, among which are market risk, operating risk and country risk, to value the capital funds requirement.

As a consequence of the global health pandemic effects of COVID-19 decreed by the World Health Organization (WHO), the need and convenience of establishing temporary special measures such as the validity of the appraisal reports used for the constitution of collateral on movable and immovable property has been made evident through General Resolution SBP-GJD-0004-2020 of the Board of Directors. In addition, for the purposes of Article No. 2 of Agreement No. 3-2016, all risk assets classified in categories 7 and 8, whose weighting is 125% and 150% respectively, will be temporarily weighted as part of category 6, whose weighting is 100% through the 'Board of Directors' General Resolution SBP-GJD-0005-2020.

5. Accounting estimates, critical judgments and contingencies

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial period. Estimates and judgments are periodically assessed and based on the historical experience and other factors, including expectations of future events considered reasonable under the circumstances.

Judgments

In the process of applying the Bank's accounting policies, Management has made the following judgments, which have the most significant effect on the amounts recognized in the consolidated financial statements.

- (a) Valuation of business model: The classification and measurement of financial assets depends on the results of the SPPI and the testing of the business model. The Bank determines the business model at a level that reflects how financial asset groups are managed together to achieve a particular business objective. This valuation includes reflecting all relevant evidence including how asset performance is evaluated and its performance measured, the risks that affect asset performance and how they are managed. The Bank monitors financial assets measured at amortized cost or at fair value through other comprehensive income that are written-off before maturity, to understand the reason for write-off and whether the reasons are consistent with the business objective for which the asset was held.
- (b) Significant increase in credit risk: For Stage 1 assets, the expected losses are measured as a reserve equal to 12-months expected credit losses, or lifetime expected losses for Stage 2 assets or Stage 3 assets. An asset moves to Stage 2 when its credit risk has increased significantly since initial recognition. When assessing whether the credit risk of an asset has increased significantly, the Bank takes into account reasonable and supported prospective information, both qualitative and quantitative.
- (c) Establishing the number and relative weights of forward-looking scenarios and determining the relevant forward-looking information for each scenario: When measuring ECLs, the Bank uses reasonable and sustainable forward-looking information, which is based on assumptions for the future movement of different economic forecasts and how those forecasts will affect each other.
- (d) Establishing groups of assets with similar credit risk characteristics: When expected credit losses are measured on a collective basis, financial instruments are grouped based on shared risk characteristics.

The Bank monitors the appropriateness of credit risk characteristics on a continuous basis to assess whether they continue to be similar. This is required to ensure that, when the credit risk characteristics change, there is appropriate re-segmentation of the assets. This may result in the creation of new portfolios or that assets are moved to an existing portfolio that best reflects the similar credit risk characteristics of that group of assets. Portfolio re-segmentation and movement between portfolios is more common when there is a significant increase in credit risk (or when this significant increase is reversed) and therefore assets move from 12-months to expected credit losses over a life time, or vice versa, but it can also occur within portfolios that continue to be measured with the same 12-month basis or expected credit losses over a life time but the amount of expected credit losses changes because the portfolio's credit risk differs.

(e) Models and assumptions used: The Bank uses various models and assumptions in measuring the fair value of financial assets, as well as in estimating expected credit losses. The judgment is applied in the identification of the most appropriate model for each type of asset, as well as to determine the assumptions used in those models, including the assumptions that relate to the key credit risk indicators.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

- (f) Reserve for expected credit losses When determining the reserve for expected credit, Management's judgment is required to evaluate the amount and timing of future cash flows in order to determine whether the credit risk has increased significantly from initial recognition, taking into account loan characteristics and default patterns in the past for similar financial instruments. The changes in the risk of default that occur in the next 12 months may be a reasonable approximation of the changes in the risk measured according to the life of the instrument. The Bank uses the changes in the risk of default that occur in the next 12 months to determine if the credit risk has increased significantly since initial recognition, unless the circumstances indicate that an assessment of the life of the instrument is necessary.
- Impairment losses on loans at amortized cost The Bank reviews its individually significant loans on each date of the consolidated statement of financial position to assess whether an impairment loss should be recorded in the consolidated statement of profit or loss. In particular, Management's judgment in estimating the amount and future cash flows is required to determine the impairment loss. These estimates are based on assumptions regarding a number of factors and actual results may differ, resulting in future changes in the provision. Loans that have been individually assessed (and are not impaired) are evaluated together with other non-significant loans in groups of assets with similar risk characteristics. This is done to determine whether it is convenient to establish reserves due to loss events incurred for which there is objective evidence, but whose effects are not yet evident. The collective assessment takes into account the loan portfolio data (such as delinquency levels, credit utilization, loan-collateral relationships, etc.), and judgments on the effect of risk concentration and economic data (including unemployment levels, consumer price indexes, country risk and the performance of different individual groups).
- (h) After evaluating the recoverable value of the generating units to which the goodwill is allocated, Management considers that the goodwill of Banvivienda's generating unit is the most significant given its weight, whose value is 82% of the total goodwill in the balance sheet and, in addition, the most susceptible to impairment caused by current economic conditions and the effects of COVID-19. The budgets comprise forecasts of income, interest costs, provisions and overhead based on current and anticipated market conditions that have been considered and approved by the Board of Directors. While the Bank has made the projections using the best evidence as of the balance sheet date and applying its judgment on future forecasts, the projections are inherently uncertain due to the uncertainty in the economy as to the ultimate effect that COVID-19 will have.

The key assumptions in determining the recoverable amount are disclosed in Note 13.

- (i) Impairment of the value of investments measured at fair value through other comprehensive income and investments measured at amortized cost The Bank reviews its debt securities classified as investments at fair value through other comprehensive income and investments at amortized cost at the end of each reporting date to assess whether they are impaired. This requires a judgment similar to that applied to the individual evaluation of investment securities. The Bank records impairment when there has been a significant or prolonged decrease in the fair value below its cost. The determination of what is "significant" or "prolonged" requires judgment. In making this judgment, the Bank evaluates, among other factors, historical price movements and the duration and degree to which the fair value of an investment is lower than its cost.
- (j) Fair value and valuation processes of financial instruments The Bank measures fair value using hierarchy levels that reflect the meaning of data inputs used in the measures. In order to determine fair value, the Bank has established a documented process and policies that assigns responsibilities and the segregation of duties among the different areas responsible involved in this process, which has been approved by the Assets and Liabilities Committee (ALCO), the Risk Committee, and the Board of Directors.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

When the Bank uses or contracts third parties as pricing agents to determine the fair value of the instruments, this control unit assesses and documents the evidence obtained from these third parties that support the conclusion that such valuations meet IFRS requirements. This review includes:

- Verifying that the pricing agents have been approved by the Bank;
- Obtain an understanding of how the fair value was determined and if it reflects current market transactions.

IFRS 13 specifies a hierarchy of valuation techniques based on whether the information included in such valuation techniques is observable or unobservable. Observable information reflects market data obtained from independent sources; the non-observable information reflects the Bank's market assumptions. These two types of information have created the following fair value hierarchy:

Level 1: Inputs that are listed market prices (unadjusted) in active markets for identical assets and liabilities to those that the entity can access on the measurement date.

Level 2: Prices listed in active markets for similar financial instruments or use of a valuation technique where all variables are obtained from observable market information for the assets or liabilities either directly or indirectly. In some cases, the Bank uses benchmark information from active markets for similar instruments, and in other instances, it employs discounted flow techniques where all variables and inputs from the model are obtained from observable market information.

Level 3: When inputs are not available and the fair value is required through a valuation model, the Bank relies on entities engaged in the valuation of equity instruments or of the asset management entities or liabilities in question. The models used to determine the fair value are usually through discount of flows or valuations that use historical market observations.

The Bank considers that its valuation methodologies for Level 3 investments are appropriate. However, the use of different estimates of unobservable inputs could give different results as to the fair value of such investments. For investments classified as Level 3, valued by the Bank, adjustments in the credit margin in the case of fixed income (+100 bps and - 100 bps) would result in the following favorable and unfavorable impacts on the Bank's equity.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

The fair values of financial assets and liabilities included in Level 2 and Level 3 as shown above have been determined in accordance with generally accepted pricing models based on discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

The fair value of interbank and client deposits is estimated using the discounted cash flow technique, by applying rates offered for deposits with similar terms and maturities. The fair value for demand deposits is the amount payable at the date of the condensed consolidated financial statements.

<u>The movement of investments at fair value through other comprehensive income, and investments at fair value through profit or loss in Level 3 is as follows:</u>

| | March 2021 | June 2020 |
|---|---------------|--------------|
| Balance at beginning of the period | 294,668,176 | 197,551,777 |
| Additions | 139,414,091 | 75,192,430 |
| Reclassifications from Level 2 to Level 3 | - | 36,006,966 |
| Reclassifications from Level 3 to Level 2 | (523,000) | (3,860) |
| Net changes in securities | (1,145,999) | (600,674) |
| Redemptions and amortization | (108,644,050) | (13,478,463) |
| Balance at the end of the period | 323,769,218 | 294,668,176 |

As of March 31, 2021, Level 3 investments at fair value through other comprehensive income did not affect the Bank's profits.

The total unrealized gain or loss for investments at fair value through other comprehensive income classified as Level 3 as of March 31, 2021 is for (B/.2,353,370) (June 2020: B/.1,207,370).

As of March 31, 2021, reclassifications between Level 2 and Level 3 investments in domestic corporate bonds occurred as a result of observed activity in the securities market in which they are listed.

(c) <u>Deferred income tax</u>

Details of the deferred income tax can be found in Note 30.

(d) Hedge derivatives

The Bank reduces its credit risk in relation to these agreements by using financially sound institutions as counterparts. These contracts are recorded at fair value in the consolidated statement of financial position using fair value hedge or cash flow hedge methods, in other assets and other liabilities, as applicable.

Fair value hedge

To manage its position in the consolidated statement of financial position, the Bank has entered into interest rate swap contracts on financing with a nominal value of B/.200,000,000 as of March 31, 2021, which allows the conversion from fixed interest rate to variable rate during each payment period.

Below is a summary of derivative contracts by maturities and accounting method:

March 2021 Remaining maturity of nominal value

| Accounting method | More than 1 year | <u>Less than 1</u> <u>year</u> | <u>Total</u> |
|---------------------|---------------------|-----------------------------------|--------------|
| Cash flows Total | 200,000,000 | | 200,000,000 |

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

The nominal value and estimated fair value of interest rate swaps are presented in the table below. The fair value of derivative financial instruments is estimated using internal valuation models with observable market data.

March 2021

| <u>Type</u> | Par <u>value</u> | Fair <u>value</u> |
|---|---------------------|----------------------|
| Derivatives for cash flow hedging (for financing) | 200,000,000 | 214,079 |
| Total | 200,000,000 | 214,079 |

For the fair value hedge derivatives, the gains or loss from the changes in the fair value of the hedging instrument as well as the hedged item attributable to the hedged risk are included in other income (expenses).

26. Excess paid-in capital - Share option plan for employees

As of March 31, 2021, key executive officers held stock options over 35,583 common shares of the Parent Company (G.B. Group Corporation) (June 2020: 71,672), of which 18,630 shares may be exercised in 2021; 16,953 may be exercised in 2022, with an average strike price of B/.41.00 as of March 31, 2021 (June 2020: B/.39.89). The Bank recognized income for B/.366,390 (March 2020: B/.203,550) in the condensed consolidated statement of profit or loss under the line item salaries and other personnel expenses and the corresponding entry in the shareholders' equity, which reflects the capital contribution it will receive from its Parent Company.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

27. Commitments and contingencies

The Bank maintains financial instruments outside the consolidated statement of financial position with credit risks arising in the normal course of business, which involves elements of credit and liquidity risk. Such financial instruments include commercial letters of credit, granted endorsements and collateral and promissory notes, which are summarized as follows:

| | March 2021 | June 2020 |
|-----------------------------|---------------|---------------|
| Letters of credit | 141,283,227 | 102,177,552 |
| Endorsements and collateral | 490,109,694 | 453,158,568 |
| Promissory notes | 158,198,528 | 231,749,808 |
| Unused credit lines | 451,762,420 | 439,087,347 |
| Total | 1,241,353,869 | 1,226,173,275 |

Commercial letters of credit, collateral issued and loan commitments include exposure to some credit loss in the event of default by the customer. The Bank's credit policies and procedures to approve credit commitments and financial collateral are the same as those for granting of loans that are recorded on the condensed consolidated statement of financial position.

Collateral issued have fixed maturity dates and most expire without being drawn upon, and therefore, they generally do not represent a significant liquidity risk to the Bank. With respect to the commercial letters of credit, most are used; however, the majority are on-demand and paid immediately.

Promissory notes represent conditional promises accepted by the Bank, once certain conditions have been met, which have an average maturity of six months and are used basically for disbursements of mortgage loans. The Bank does not anticipate losses as a result of these transactions.

28. Management of trust contracts and investment portfolio

As of March 31, 2021, the Bank held trust contracts at the client's risk that amounted to B/.2,900,287,813 (June: 2020: B/.2,868,011,581).

30. Income taxes

Income tax returns for the last three years of banks incorporated in the Republic of Panama are subject to examination by the tax authorities, including for the year ended June 30, 2020, according to current fiscal regulations.

According to current Panamanian tax legislation, banks are exempt from payment of income tax on profits derived from foreign operations, interest earned on time deposits placed in local banks, interest earned on Panamanian Government securities and securities issued through Panama's Stock Exchange.

The subsidiaries Global Capital Investment Corp., Global Bank Overseas and Banvivienda Assets are not subject to income tax payment in their respective jurisdictions, due to the nature of their foreign operations; however, the income tax on operations that generate taxable income in other jurisdictions is classified within the income tax expense.

As of January 1, 2010, by means of Law No.8 of March 15, 2010, Article No.699 of the Tax Code states that all legal entities whose annual income exceeds one million five hundred thousand balboas (B/.1,500,000) must pay an income tax calculated at 25% on whichever amount is greater: (1) the net taxable income calculated by the standard method established in Title I of the Fourth Book of the Tax Code, or (2) the net taxable income resulting from multiplying the total taxable income by four point sixty-seven percent (4.67%).

The current income tax (benefit) expense is broken down as follows:

| | March 2021 | March 2020 |
|---|---------------------------|--------------------------|
| Current income tax Deferred tax for temporary differences | 2,670,016 (11,646,375) | 4,559,989 (3,763,055) |
| (Benefit) income tax expense | (8,976,359) | 796,934 |

The average effective rate of the current income tax is 9% as of March 31, 2020.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

The tax effect item that comprises the deferred tax asset included in the consolidated statement of financial position is the reserve for possible loans losses and the goodwill tax effect, which is broken down below. (See Note 13):

| | March 2021 | June 2020 |
|--|---------------|--------------|
| Balance at the beginning of the period | 33,894,103 | 25,878,425 |
| Effect of IFRS adoption | - | 108,010 |
| Other charges | - | (427,424) |
| Credit to profit or loss during the period | 11,646,375 | 8,335,092 |
| Balance at the end of the period | 45,540,478 | 33,894,103 |

Deferred assets are recognized based on the deductible tax differences considering their past operations and projected taxable profits, which are influenced by Management's estimates. Based on current and projected results, the Bank's Management considers that there will be sufficient taxable income to absorb the deferred income tax previously described.

A reconciliation of income tax is shown below:

Transfer pricing:

On August 29, 2012, Law No.52 entered into force, reforming regulations on transfer pricing, a price regime oriented to regulate transactions for tax purposes between related parties, so that the considerations between them are similar to those made between third parties. According to those rules, taxpayers carrying out transactions with related parties that have an impact on income, costs or deductions for determining taxable income for purposes of income tax for the fiscal period to be declared or the transaction taking place, must prepare an annual report on the operations performed within six months following the termination of the relevant tax period (Form 930). These transactions are subject to a review in order to verify that they meet the assumptions established in the Law.

At the date of these consolidated financial statements, the Bank is in the process of contemplating such an analysis, but according to Management, it is not expected that it will have a significant impact on the estimated income tax for the period.

Dynamic reserve

Accounting treatment for differences between prudential standards and IFRSs

As indicated in Note 2, the Bank adopted IFRSs for the preparation of its accounting records and the presentation of its consolidated financial statements. According to General Board Resolution SBP GJD-0003-2013, the accounting treatment of the differences between IFRS and prudential standards based on the following methodology is established.

- The respective figures for the calculations of the application of IFRS and prudential regulations issued by the Superintendency of Banks of Panama (SBP) will be made and compared.
- When the calculation performed in accordance with IFRSs results in a reserve resulting greater than the one resulting from the use of prudential standards, the IFRS figures will be recorded.
- When using prudential standards result in a higher reserve, IFRS figures will also be recorded in profit
 and loss and the difference will appropriate retained earnings, which will be moved to a regulatory reserve
 in equity. If the Bank does not have sufficient retained earnings, this difference will be presented as an
 accumulated deficit account.
- The regulatory reserve referred to in the preceding paragraph cannot be reversed against retained earnings while there are differences between IFRSs and prudential rules that originated it.

According to Agreement No. 4-2013, the restriction of the dynamic reserve establish that the amount cannot be less that the amount established for the previous quarter. As of March 31, 2021, the dynamic provision was for B/.87,863,198 (June 2020: B/.87,863,198).

By means of the Board of Directors' General Resolution SBP-GJD-0007-2020 of July 16, 2020, Article No. 1 temporarily suspends the obligation to create the dynamic provision established in Articles No. 36, 37 and 38 of Agreement No. 4-2013 on credit risk, in order to provide financial relief to banks in the market.

Letters of credit, collateral issued, and promissory notes are exposed to credit losses in the event that the customer does not fulfill its payment obligations. Policies and procedures for approving credit commitments, financial collateral and promissory notes are the same as those used for granting loans recorded on the consolidated statement of financial position.

Most letters of credit are used; however, most of those used are on demand and their payment is immediate.

Credit lines for customer disbursements correspond to outstanding guaranteed loans, which are not shown in the consolidated statement of financial position but are recorded in the Bank's memorandum accounts.

Foreclosed assets

As of March 31, 2021, the regulatory reserve on foreclosed assets amounts to B/.11,316,133 (June 2020: B/.9,469,118) based on the reserve of Agreement No. 3-2009 of the Superintendency of Banks of Panama.

Premiums and notes receivable

Article No.156 of Law No.12 of April 3, 2012, establishes:

a) Suspension of coverage: when the contractor has made the payment of the first premium installment and is delayed by more than the grace period stipulated in the payment of any subsequent premium installments, in accordance to the payment Schedule established in the corresponding policy, it will be understood to have incurred in the default of payment, which will have the immediate legal effect of suspending the policy's coverage for up to sixty days.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

b) The suspension of coverage shall remain until the contractor makes the overdue payments, enabling the reestablishment of the policy's coverage from the moment of the premium payments for said period are made, or until the policy has been cancelled in accordance with the reserve of Article No.161.

Article No.161 of Law No.12 of April 3, 2012 specifies:

- a) Any policy cancellation notice shall be sent to the contractor at the last physical, postal or electronic address that appears in the policy file kept by the insurance company. Copy of the cancellation notice must be issued to the insurance broker.
- b) Any change in the contractor's address must be notified to the insurance Company; otherwise, the last address on the insurance company's file will remain as the valid address.
- c) The cancellation notice of the policy for non-compliance with premium payments must be sent to the contractor in writing, fifteen business days in advance. If the notice is not sent, the contract will remain in force and the reserve in Article No.998 of the Commercial Code will apply.

Technical reserves

Pursuant to Law No.12 of April 3, 2012, the subsidiary Aseguradora Global, S.A. transferred from liability to equity the reserve for statistical deviations and the reserve for catastrophic risk and/or contingencies.

Assets admitted free of encumbrances must cover such capital reserves.

Such reserved shall be cumulative. The Superintendency of Insurance and Reinsurance of Panama will regulate their use and restitution when the claim rate shows adverse results.

Laws and Regulations:

a) Banking Law

In the Republic of Panama, banks are regulated by the Superintendency of Banks of Panama, through Executive Decree No.52 of April 30, 2008, which adopts the sole text of Decree Law No.9 of February 26, 1998, as amended by Decree Law No.2 of February 22, 2008, as well as Resolutions and Agreements issued by that entity. The main aspects of this law include: authorization of bank licenses, minimum capital and liquidity requirements, consolidated supervision, credit and market risk management procedures, anti-money laundering procedures, banking intervention and liquidation procedures, among other. Likewise, the banks will be subject to at least one inspection every two (2) years by the auditors of Superintendency of Banks of Panama, to determine their compliance with the reserve of Executive Decree No. 52 of April 30, 2008 and Law No. 42 of October 2, 2000, the latter on the prevention of money laundering.

Compliance with the regulatory body

Liquidity ratio

As of March 31, 2021, the liquidity ratio percentage reported to the regulatory body, under the parameters of Agreement No. 4-2008, was 56.01% (June 2020: 50.27%) (See Note 4.3).

Capital adequacy

The Law demands that Banks with a general license must have a minimum paid-in capital or assigned capital of ten million balboas (B/.10,000,000) and equity funds of no less than 8% of their weighted assets, including off-balance sheet operations. As of March 31, 2021, the Bank holds condensed consolidated equity funds of approximately 15.49% (June 2020: 14.58%) of its risk-weighted assets, in accordance with Agreement No. 1-2015 and Agreement No. 3-2016 and the new agreements, Agreement No. 11-2018 and Agreement No. 2-2018. (See Note 4.5).

As a consequence of the global health pandemic effects of COVID-19 decreed by the World Health Organization (WHO), the need and convenience of establishing temporary special measures such as the validity of the appraisal reports used for the constitution of collateral on movable and immovable property has been manifested through General Resolution SBP-GJD-0004-2020 of the Board of Directors. In addition, for the purposes of Article No. 2 of Agreement No. 3-2016, all risk assets classified in categories 7 and 8, whose weighting is 125% and 150% respectively, will be temporarily weighted as part of category 6, whose weighting is 100% through the 'Board of Directors' General Resolution SBP-GJD-0005-2020.

The accounting treatment for the recognition of loan losses, investment securities and foreclosed assets of borrowers in accordance with the prudential standards issued by the Superintendency of Banks of Panama, differs in certain aspects from the accounting treatment under the International Financial Reporting Standards, specifically IAS 39 and IFRS 5. The Superintendency of Banks of Panama requires that general license banks apply these prudential standards.

b) Insurance and reinsurance Law

Insurance and reinsurance operations in Panama are regulated by the Superintendency of Insurance and Reinsurance of Panama in accordance with the legislation established by the Insurance Law No. 12 of April 3, 2012 and the Reinsurance Law No. 63 of September 19, 1996.

c) Securities Law

Stock Exchange operations in Panama are regulated by the Superintendency of Securities Market of Panama in accordance with the legislation established in Decree Law No.1 of July 8, 1999, amended by Law No.67 of September 1, 2011. The operations of the Stock Exchange are in the process of being aligned with Agreement No. 4-2011, modifying certain reserve through Agreement No. 8-2013, established by the Superintendency of Securities Market of Panama, which indicate that these are required to comply with the capital adequacy standards and its modalities.

d) Trust Law

Trust operations in Panama are regulated by the Superintendency of Banks of Panama in accordance with the legislation established in Law No.1 of January 5, 1984.

e) Financial Leasing Law

Financial leasing operations in Panama are regulated by the Directorate of Financial Companies of the Ministry of Commerce and Industries in accordance with the legislation established in Law No. 7 of July 10, 1990.

34. COVID-19 effect

The appearance of the Coronavirus COVID-19 in China at the end of 2019 and its recent global expansion to a large number of countries, has caused the viral outbreak to be qualified as a pandemic by the World Health Organization since March 11, 2020.

As a result of such global affectation and its respective arrival to our country, the National Government decreed a state of national emergency. The national emergency established a quarantine with limited citizen circulation and a closure of a large part of the economy. The operation of all businesses and industries was divided into 6 blocks.

The COVID-19 outbreak has significantly affected the Panamanian economy at the macro and micro levels. This impact may negatively affect the Bank's operating results. Likewise, the Bank is exposed to the performance of its customers, whose consumer loans and commercial operations have been affected by the closure of the economy as a measure to control the spread of the virus. Loan defaults that negatively affect the Bank's earnings correlate with deteriorating economic conditions (such as unemployment and business closures).

The Bank's financial position and results of operations are particularly dependent on the ability of borrowers to meet loan obligations. While its effects continue to materialize, the COVID-19 pandemic has resulted in a significant decrease in business activity throughout Panama. This decrease in business activity may cause the Bank's customers (including affected businesses and individuals) and counterparties to be unable to meet existing payment or other obligations.

The Bank has Policies and Procedures for Business Continuity, which establishes the mechanisms to operate in contingency situations, ensuring uninterrupted continuity of operations and services for our customers.

As a governmental relief measure, the National Government has established both voluntary and legal moratorium plans, has developed an economic reactivation plan by blocks for the return to normality and, among others, has developed a financial assistance program to support economic activities highly impacted by the pandemic.

Notes to the condensed consolidated financial statements for the nine months ended March 31, 2021 (In balboas)

In order to further strengthen banking institutions in Panama, the Superintendency of Banks of Panama issued Agreement No. 2-2020 (as amended by Agreement No. 3-2020) to create a temporary regulation for pandemic "modified loans". Pursuant to the temporary regulation of Agreement No. 2-2020, a modified loan is a loan for which the original terms and conditions have been modified at the request of the borrower or at the initiative of the bank, without being considered a restructured loan. The new terms and conditions of modified loans must consider financial feasibility criteria based on the borrower's repayment capacity and the Bank's credit policy.

On March 31, 2020, Global Bank Corporation voluntarily agreed to grant an automatic grace period to borrowers affected in their business or personal activities by COVID-19. On May 4, 2020, the Government of Panama and the Panamanian Banking Association signed an agreement whereby the members of the Banking Association agreed (i) to extend such grace period until December 31, 2020 to any borrower whose commercial or personal activities were affected by COVID-19 and who so requested. This extension applies to mortgage loans, personal loans, auto loans, credit cards, SME loans and commercial loans, and (ii) not to exclude mortgages granted by borrowers affected by COVID-19 who have loans with extended grace periods.

The Panamanian government issued Law No. 156, which grants a moratorium until December 31, 2020 on loan payments to any borrower that can prove that COVID-19 affects it in its commercial or personal activities. Under the terms of the statute, the moratorium applies to mortgage loans, personal loans, auto loans, credit cards, SME loans, commercial loans, loans to the transportation sector, loans to the agricultural and livestock sector, and consumer loans.

As of September 2020, the opening of economic activities began, which has been proportionally based on the behavior of the virus and the infection rates in the country. This opening includes retail, wholesale, restaurants and the construction industry. In addition, the restriction on mobility by gender was lifted in order to reactivate the country's economy.

As part of the Bank's risk management, both collective and individual analyses of the condition of the loan portfolio have been developed from which policies, processes and procedures have been developed for continuous evaluation based on established strategies.

The COVID-19 pandemic has created economic and financial disruptions that have adversely affected, and are likely to continue to adversely affect the Bank's business, of which its extent will depend on future developments that are highly uncertain and cannot be predicted. This includes the scope and duration of the pandemic, the effectiveness of the Bank's response plan, the direct and indirect impact of the pandemic on our customers and counterparties, as well as other market participants, and actions taken by governmental authorities (both domestic and abroad) and other third parties in response to the pandemic.

The effects known to Management and that can be reasonably estimated have been recognized in the condensed consolidated financial statements as of March 31, 2021. Based on the best evidence available at the balance sheet date, Management has performed the impact analysis and adjusted it in these condensed consolidated financial statements. Based on the above, the most significant impact resulting from COVID-19 is in the provision for expected losses as disclosed in Note 4.2 of the condensed consolidated financial statements. The Bank's Management will continue to monitor and modify operating and financial strategies to mitigate potential risks that could affect its business in the short, medium and long term.

35. Modified loans

On September 10, 2020 and according to note SBP-DR-N-4489-2020, the Superintendency of Banks of Panama required the Bank to incorporate additional disclosures on modified loans in the annual financial statements according to Agreement No. 2-2020 of March 16, 2020,. On September 11, 2020, Banking Agreement No. 9-2020 was issued, which amends Agreement No. 2-2020 and establishes the requirement for additional disclosures on modified loans in the annual financial statements of the Banks.

On September 11, 2020, the Superintendency of Banks of Panama published Agreement No. 9-2020, which establishes the characteristics that modified loans must comply with at the initiative of the banks or at the request of the debtor. Banks will have until December 31, 2020 to reevaluate the loans of those debtors whose cash flow and payment capacity have been affected by the COVID-19 situation, as well as loans that have not been previously modified and that at the original time of their modification were up to 90 days past due.

For credit risk coverage, banks must establish provisions on the portfolio of modified loans classified in the "Modified Special Mention" category, ensuring compliance with International Financial Reporting Standards (IFRSs) equivalent to the greater value between the provision according to IFRS of the Modified Special Mention portfolio and a generic provision equivalent to three percent (3%) of the gross balance of the modified loan portfolio, including uncollected accrued interest and capitalized expenses. Modified loans secured by pledged deposits in the same bank up to the guaranteed amount may be excluded from this calculation.

On October 21, 2020, the Superintendency of Banks of Panama issued Agreement No. 13-2020, which amended Agreement No. 2-2020 establishing additional, exceptional and temporary measures on credit risk and an additional term for financial relief measures.

Banks will have until June 30, 2021 to continue evaluating the credits of those debtors whose cash flow and payment capacity have been affected by the COVID-19 situation and that at the original time of their modification were up to 90 days in arrears.

Likewise, banks may make modifications to those loans that have not been previously modified, whose cash flow and payment capacity continue to be affected by the COVID-19 situation and that are not more than 90 days past due.

During the period January 1 through June 30, 2021, the Bank will not execute the collateral for the modified loans.

These changes are due to the health, economic, financial and social consequences that the spread of COVID-19 has generated. In view of this reality and the economic recession it has caused, many debtors are unable to meet or continue to adequately meet their bank obligations, due to the potential or actual impairment of their ability to pay.

35.1. Legal Framework - Agreement No. 2-2020

Given the unprecedented situation experienced by the Panamanian economy due to the global pandemic situation, the Superintendency of Banks of Panama issued Agreement No. 2-2020, which establishes additional, exceptional and temporary measures for compliance with the provisions contained in Agreement No. 4-2013 on credit risk. Thus, relief measures are derived with modification of financial terms and conditions of bank loans, through the creation of a new modality of credits, called "modified loans".

Agreement No. 2-2020 establishes provisions that apply to both consumer loans and corporate loans. In order to allow the debtor the proper attention to its obligation in the face of the potential or actual deterioration of the possibility of payment due to the crisis caused by COVID-19, the Banks may modify the terms of the loans, originally agreed, categorizing the loans as modified; and not considering them as restructured loans according to provisions of Agreement No. 4-2013. This modification may be made at the request of the debtor or at the initiative of the Bank.

The relief measures established for debtors who have been affected by the COVID-19 situation and who meet the criteria of Agreement No. 2-2020 include the revision of loan terms and conditions, granting grace periods and maintaining the credit ratings assigned at the time the agreement became effective.

In addition, Agreement No. 2-2020 allows the Banks to use up to 80% of the dynamic provision for the constitution of specific provisions and suspends the application of the contagion mechanism in credit ratings for the duration of the additional, exceptional and temporary measures.

On March 31, 2020, Global Bank Corporation voluntarily agreed to grant an automatic grace period to borrowers affected in their business or personal activities by COVID-19, until June 30, 2020.

On May 4, 2020, the Government of Panama and the Panamanian Banking Association signed an agreement whereby the members of the Banking Association agreed (i) to extend such grace period until December 31, 2020 to any borrower whose business or personal activities were affected by COVID-19 and who so requested; this extension applies to mortgage loans, personal loans, auto loans, credit cards, SME loans and commercial loans, and (ii) not to foreclose residential mortgage collateral of borrowers affected by COVID-19 who have loans with extended grace periods.

On June 30, 2020, the Panamanian Government issued Law No. 156, which granted a moratorium until December 31, 2020 on loan payments to any borrower who can prove that COVID-19 affects it in its commercial or personal activities. Under the terms of the statute, the moratorium applies to mortgage loans, personal loans, auto loans, credit cards, SME loans, commercial loans, loans to the transportation sector, loans to the agricultural and livestock sector, and consumer loans.

35.2.1. Determining a significant risk increase in modified loans

The extension of loan payments or modified loans established by Agreement No. 2-2020 does not automatically translate into those loans having suffered a significant increase in credit risk given that a significant portion of these reliefs address temporary liquidity events generated by the closure or economic downturn caused by the Pandemic. As part of the expected loss methodology, the Bank has mechanisms to identify the significant increase in risk applicable in general terms to the loan portfolio, based on quantitative and qualitative methodologies that incorporate, among other components, behavioral scoring models for consumer debtors and internal qualification (rating) models for corporate debtors.

The assessment for the recognition of expected credit losses over the life of the modified loans considers credit risk based on the best available quantitative and qualitative information on the current circumstances of borrowers and impact of COVID-19.

As time passes and the Bank returns to the new normal, it obtains more information from the borrowers which will complement the analysis and identification of the increase in risk for the modified loans, either by segment or on an individual basis. In order to identify the significant increase in credit risk for modified loans, the Bank considers the following factors associated with the current COVID-19 situation:

- 1. For the consumer portfolio, the affectation of customers is determined through conditions related to the age of the last payment received and causes such as; termination of contracts, suspended contracts and decrease in income.
- 2. With respect to the corporate portfolio and other loans, clients are evaluated on a case-by-case basis to determine the impact of COVID-19 on the line of business, economic activity in which it operates and vulnerability conditions that may be identified in the context of future economic conditions.

36. Approval of the condensed consolidated financial statements

The condensed consolidated financial statements of Global Bank Corporation and Subsidiaries for the period ended March 31, 2021 were authorized by General Management and approved by the Board of Directors for their issuance on April 28, 2021.
